Submission to ETS Review Panel 2012 (#2)

Submitted by climaterealists on Sat, 02/06/2012 - 16:28

Please add my name to those requesting that the ETS/carbon tax scheme end as soon as possible.

Recent more responsible research has cast doubt on the whole basis for the scheme.

We are experiencing the end of an ice age, and the human component is so miniscule that it will

never be measurable.

PLEASE REMEMBER, THE WHOLE HUMAN RACE COULD BE PACKED INTO ONE CUBIC MILE, AND

APPEAR AS NO MORE THAN ONE PIXEL ON A GOOGLE EARTH IMAGE.

STOP THE HUBRIS!

George Van V
